

## ***Structure of Academic Program Review Report (APRR)***

The program review process provides programs an opportunity to reflect upon their strengths and opportunities within the context of current pedagogical and organizational structures. The process should include input from all constituents involved with the program, including staff, faculty, current students and alumni.

The recommended structure for the PRR document is outlined below in Table 2. At a minimum, the document must address the items listed here. Data available to support each area of the PRR and the source for this data is detailed in Table 3. Where possible, all data should include a minimum of the most recent three year trend.
