THE EU-NOVA ENGINEERING FAST TRACK

Through the EU-Nova Engineering Fast Track, an innovative agreement between Eastern and Villanova University, Eastern students have the unique opportunity to access the resources found in Villanova's College of Engineering facility while maintaining the intimacy and Christian education practiced at the Eastern campus. Both Villanova and Eastern University alike have been ranked in the top tier of regional universities in the Northeastern United States. Even more, U.S. News ranks Villanova as the #50 Best National University.

This engineering agreement consists of a 5.5-year program* that leads to two degrees: a B.A. in Math from Eastern University and an M.S. in Engineering from Villanova University. Students will study for four years at Eastern's campus with classes on math and science, prerequisites needed for the graduate engineering program, and, in some cases, graduate engineering courses. Following their time at Eastern, students will then study at Villanova University for one to three years, depending on the student's timeline.

*Students typically complete the track in 5.5 years but exceptional cases can take up to 8 years.
WHY TAKE THE FAST TRACK AT EASTERN?

• Upon acceptance to Eastern University, prospective students declaring the EU-Nova Engineering Fast Track may be eligible for a $2,000 scholarship. To find out eligibility, apply online and list the EU-Nova Engineering Fast Track in the “major” field.

• Preferred Graduate Admission Status: Eastern students who maintain a preeminent academic standing are given preferential status in admission to Villanova’s graduate engineering program. Students are then able to complete Villanova’s prestigious 30-credit MS in Engineering program.

• Graduate Degree in 1-3 Years: Upon completion of a Bachelors in Math at Eastern, students can choose to complete the MS portion of the program at Villanova in as little as one year or as long as three years.

• Best of Both Worlds: Students are able to experience a rigorous, high energy academic program in math and engineering from both universities, performing graduate studies in a first-rate engineering program, receiving access to Villanova’s expansive networks and internship opportunities along with personalized support from a small, Christian, liberal arts context.

• Graduation Expectations: Graduates of this innovative program will be prepared for an exciting range of careers in mathematics, engineering, technology, and computer science.
